## **IMPLEMENT CODE OPTIMIZATION TECHNIQUES CONSTANT FOLDING**

**AIM:**

To write a C program to implement Constant Folding (Code optimization Technique).

**ALGORITHM:**

- The desired header files are declared.
- The two file pointers are initialized one for reading the C program from the file and one for writing the converted program with constant folding.
- The file is read and checked if there are any digits or operands present.
- If there is, then the evaluations are to be computed in switch case and stored.
- Copy the stored data to another file.
- Print the copied data file.

**PROGRAM:**

```
#include<stdio.h>
#include<string.h>
void main() {
    char s[20];
    char flag[20]="//Constant";
    char result,equal,operator;
    double op1,op2,interrslt;
    int a,flag2=0;
    FILE *fp1,*fp2;

    fp1 = fopen("input.txt","r");
    fp2 = fopen("output.txt","w");

    fscanf(fp1,"%s",s);
    while(!feof(fp1)) {
        if(strcmp(s,flag)==0) {
            flag2 = 1;
        }
        if(flag2==1) {
```

```

fscanf(fp1,"%s",s);
result=s[0];
equal=s[1];
if(isdigit(s[2])&& isdigit(s[4])) {
    if(s[3]=='+'||'-'||'*'||'/') {
        operator=s[3];
        switch(operator) {
            case '+':
                interrslt=(s[2]-48)+(s[4]-48);
                break;
            case '-':
                interrslt=(s[2]-48)-(s[4]-48);
                break;
            case '*':
                interrslt=(s[2]-48)*(s[4]-48);
                break;
            case '/':
                interrslt=(s[2]-48)/(s[4]-48);
                break;
            default:
                interrslt = 0;
                break;
        }
        fprintf(fp2,"/*Constant Folding*\n");
        fprintf(fp2,"%c = %lf\n",result,interrslt);
        flag2 = 0;
    }
    } else {
        fprintf(fp2,"Not Optimized\n");
        fprintf(fp2,"%s\n",s);
    }
} else {
    fprintf(fp2,"%s\n",s);
}
fscanf(fp1,"%s",s);
}
fclose(fp1);
fclose(fp2);
}

```

**OUTPUT:**

```
a = 5 + 3
//Constant
b = 7 * 2
c = 6 - 4
//Constant
d = 8 / 4
e = 9 + a
```

```
210701274
```

```
a = 8
/*Constant Folding*/
b = 14
/*Constant Folding*/
c = 2
/*Constant Folding*/
d = 2
Not Optimized
e = 9 + a
```

**RESULT:**
